

DHRUV KUMAR SINGH

DATA SCIENCE & ANALYTICS

Jaipur, Rajasthan | +91 9021889562 | dhruv25072006@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFILE SUMMARY

Analytical and highly driven Computer Science Engineering student specializing in Data Science and Analytics. Proficient in executing rigorous Data Structures & Algorithms (DSA) alongside advanced Exploratory Data Analysis (EDA) to map and solve intricate data architectural dependencies. Skilled in implementing robust machine learning pipelines, building predictive models, and constructing interactive automation architectures. Possesses a strong foundation in translating complex programmatic computations into scalable, realworld analytical strategies.

SKILLS & TECHNOLOGIES

Core Languages: Python, Java, Structured Query Language (SQL)

Data Science & ML: NumPy, Pandas, Matplotlib, Seaborn, Machine Learning Algorithms, Predictive Analysis, Quantitative EDA

Tools & Frameworks: Tableau, MySQL Workbench, MS Excel, Git/GitHub, VS Code, Jupyter Notebook

Computer Science: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP)

PROJECTS

Heart Disease Analytics Dashboard | *Tableau, MySQL, Flask, SQL, Python*

LIVE:

- Developed an interactive Heart Disease Analytics Dashboard using Tableau, MySQL, SQL, Python, and Flask to analyze healthcare data and generate actionable insights.
- Performed data collection, data cleaning, SQL-based analysis, and data preparation, then created 10+ interactive visualizations, 4 KPI cards, dynamic filters, and a Tableau Story for effective data exploration.
- Integrated the Tableau dashboard into a Flask web application, enabling users to access interactive analytics through a responsive web interface, and documented the complete project lifecycle including performance testing and dashboard reporting

Apple Inc. 10-Year Sales Trend Analysis | *Python, Pandas, Matplotlib, Seaborn*

Completed

- Extracted multi-dimensional structural insights from a decade of historical sales data records to isolate macro-growth vectors.
- Utilized Pandas and NumPy for vector operations, data parsing, aggregation routines, and time-series profiling metrics.
- Constructed advanced analytical data visualizations showcasing complex institutional operational trends.

Zomato Data Analysis & Visualization Workspace | *Python, Seaborn, Preprocessing Engine*

Completed

- Evaluated localized demographic culinary trends, cost metrics, and user preferences by exploring deep consumer data sets.
- Configured clean statistical models isolating geographical distribution arrays and cost metrics through specialized Seaborn distributions.

Retail Sales Data Structural Architecture | *NumPy, Analytical Pipelines*

Completed

- Overhauled inconsistent commercial retail database sets to maximize processing pipeline stability across varied criteria fields.
- Implemented custom demographic segmentation algorithms tracking specific repeating behavioral dynamics.

TECHNICAL ACHIEVEMENTS

- Solved **200+ complex algorithmic challenges** on [LeetCode](#), solidifying core algorithmic analysis proficiency.
- Solved **100+ data structure problems** on [GeeksforGeeks](#) focusing on algorithmic optimization.
- Selected and participated in the **Anand ICE Ideathon**, presenting programmatic strategies to solve modern software challenges.

EDUCATION

Anand International College of Engineering

Kanota, Jaipur 2024 – 2028

Bachelor of Technology (B.Tech) – Computer Science Engineering

Vidhya Sagar Academy

Bassi, Jaipur 2023-2024

Class XII (Senior Secondary) — Aggregate Score: 94%
